THE WORLD OF TEA UNDER ONE ROOF

HALSSEN & LYON

Block G

Hälsesen & Lyon
est. 1879

DEAR BUSINESS PARTNERS,

We'd like to welcome you to our latest catalogue with a peek behind the scenes of Hälssen & Lyon.

A special combination of more than 135 years of tradition and experience in the international tea business and a modern, creative spirit of innovation has shaped us to this day. From our base in Hamburg, we supply customers around the globe with premium tea products. We service a variety of customer groups – from specialist tea retailers, tea brands and private-label customers to beverage and food service industries. Likewise, in our product selection we believe in variety and the principle of “everything under one roof.”

In addition to our wide range of teas, herbals and fruit infusions from more than 130 countries, we offer our customers a wide variety of flavoured blends and teas in every conceivable form, tea extracts, instant powder mixes, basic materials for beverage production, and even the bottling of freshly brewed iced teas.

Since 1887, Hälssen & Lyon has had its headquarters at Pickhuben 9 in Hamburg's Speicherstadt, now a UNESCO World Heritage Site

Our expertise in the various tea-related specialist areas and our monitoring of latest trends in the international markets are reflected in our customised products and concepts.

At all the stages of purchasing and production, we give top priority to maintaining our high quality standards and complying with ethical principles.

On behalf of the Hälssen & Lyon team, we cordially invite you to be inspired by our catalogue range on the following pages. We have specifically tailored this selection of teas, herbals and fruit infusions to the high-end specialist tea retail.

At our company, everything revolves around tea, in every conceivable form and all under one roof. We are pleased that, as our business partner, you are part of our large and broad world of tea.

Your Hälssen & Lyon management team

Dietmar Scheffler Herwig Bertelmann

HIGHLIGHT OF A LONG JOURNEY

Each cup of good tea is the result of remarkable achievements by everyone involved in this wonderful, enjoyable product: from the experienced tea farmers in the origin countries and the skilful pickers, to the individual skilled workers in the gardens who process the fresh tea leaves into high-quality dried tea.

At Hälssen & Lyon, this fascinating world of tea literally comes together under one roof, where it meets great passion for the product. We source our raw materials from more than 130 countries around the world. Behind this are many long-term, trusting partnerships with the world's best tea gardens, which give our experienced buyers secure access to the premium qualities that we in turn are able to continuously offer our customers.

EXPERTISE IN ACTION

"It's all about tea!" At Hälssen & Lyon, everything revolves around the sourcing, refinement and further processing of this multi-faceted product. It takes wide-ranging experience in all areas to achieve the perfect end result. Starting with our knowledgeable tea tasters who test an incessant stream of samples from around the world for quality, evaluate them and purchase the raw materials at the origin.

Each tea is extensively inspected several times – immediately after harvest, upon shipping, and finally when it reaches the warehouse in Hamburg. Purchasing and sales aspects both play a role during these processes.

SPECIALISED KNOW-HOW

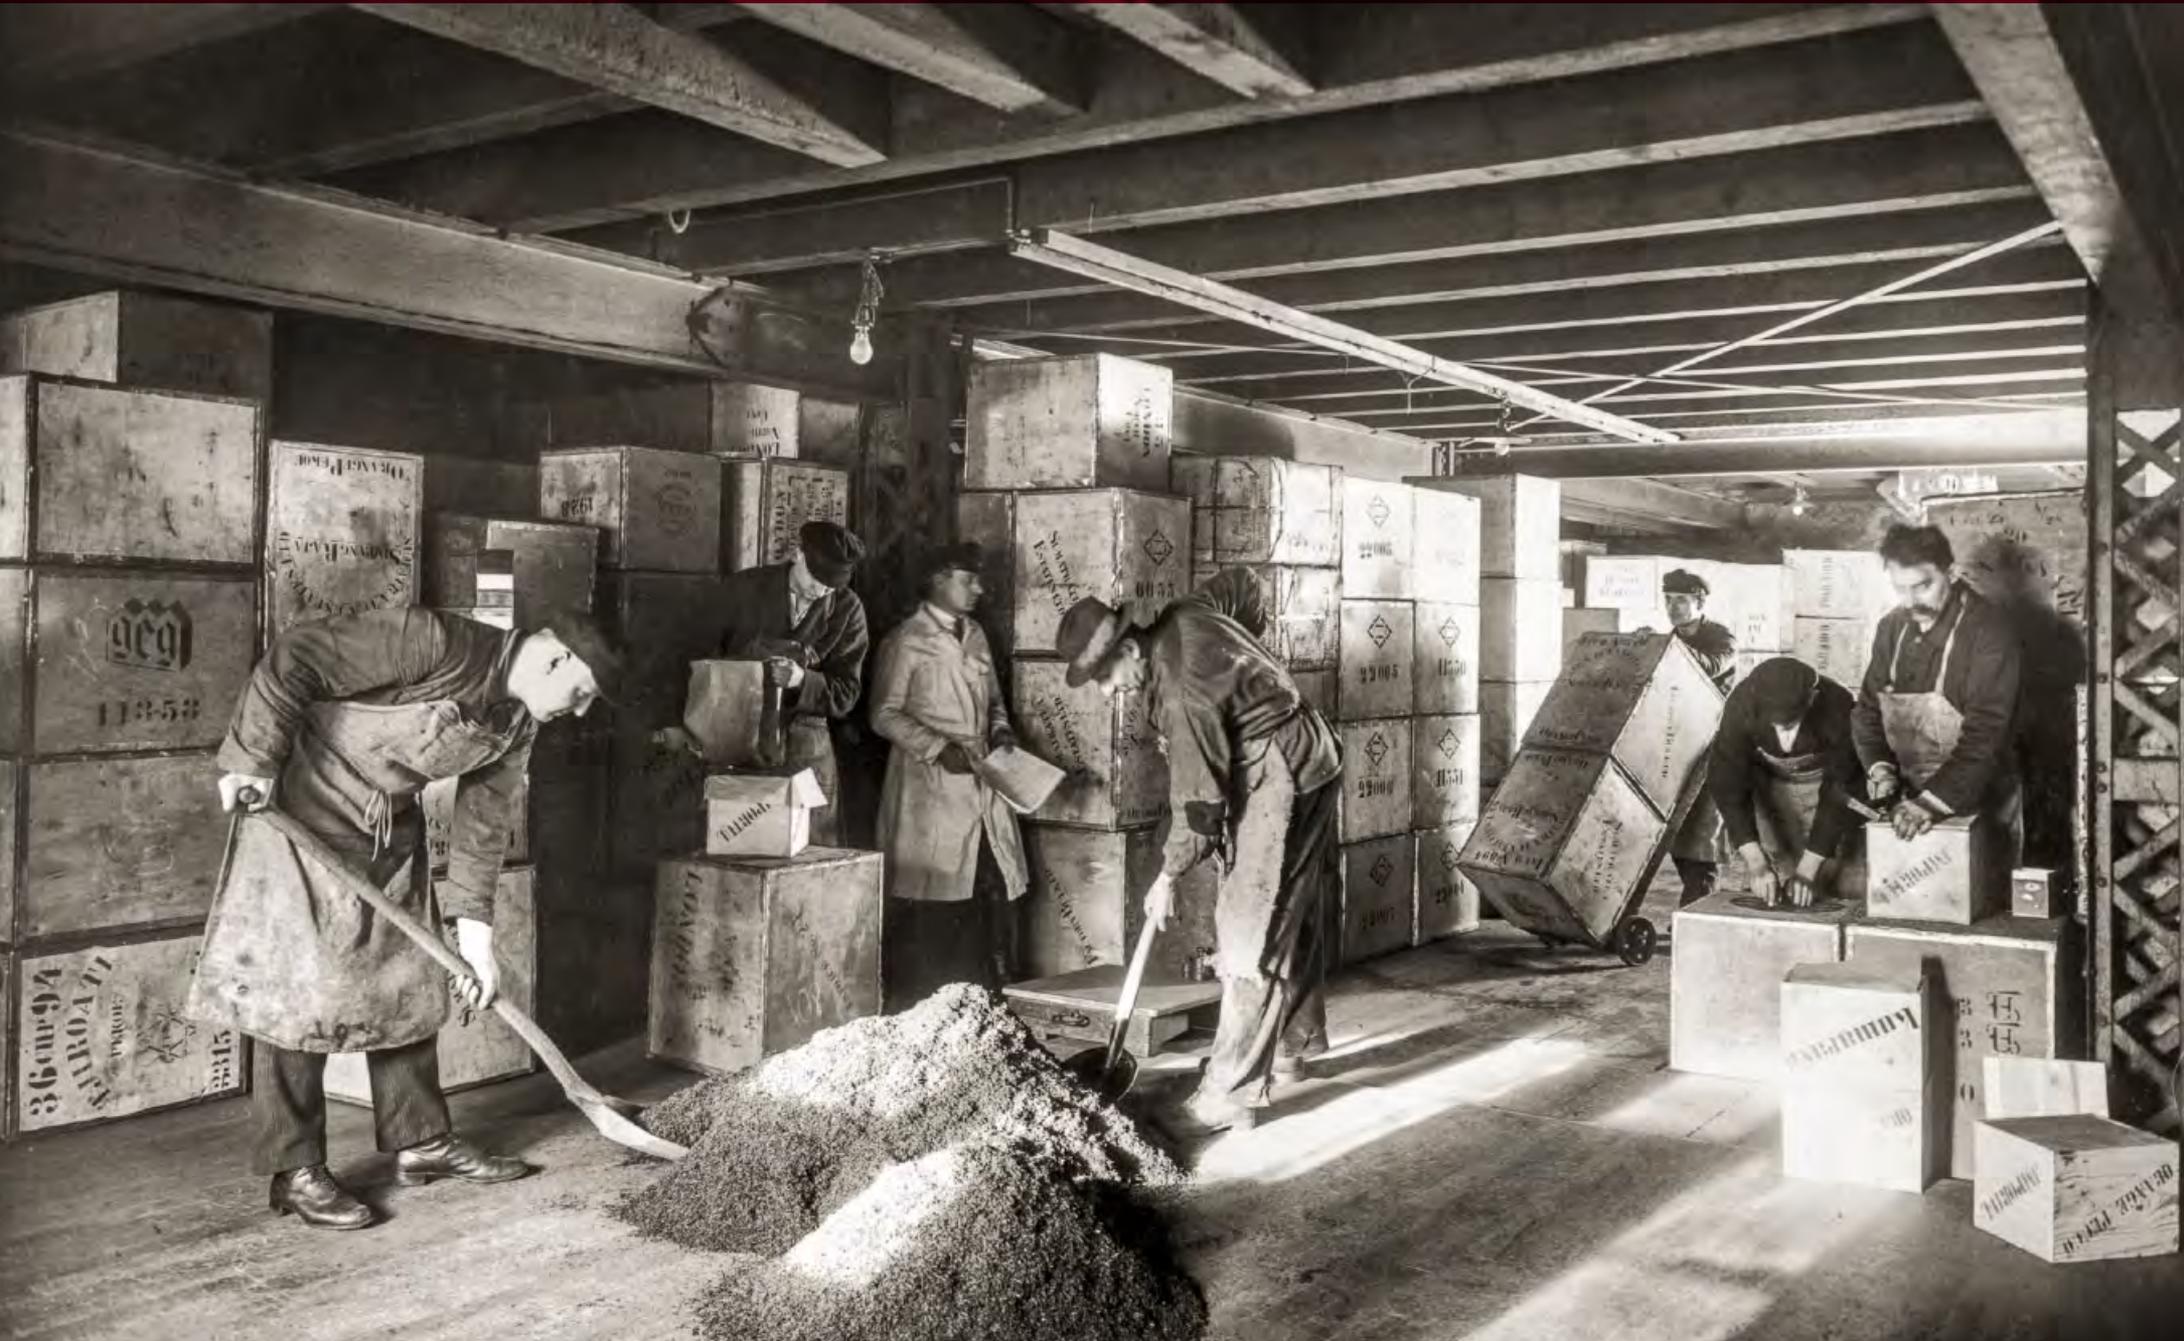

We not only know where the best qualities are, but also the needs and requirements of our various customer groups for whom the product is destined.

And that goes not only for the premium teas and tea specialities Hälssen & Lyon stands for, but also for a wide range of herbs, fruits and spices that we process in-house to use in tea creations and blends.

*In the gently rolling hills in the plains of Asia,
or clinging to the steep slopes of its high
mountain ranges, there are many tea gardens
where wonderful teas grow*

WE TASTE TEA. SINCE 1879, IN HAMBURG AND AROUND THE WORLD.

OF BARGES AND TEA FLOORS

It all started in January 1879 when Alfred Moritz Lyon and Gustav Vincent Hälssen founded their joint tea-trading venture. Shortly thereafter, they became the first tenants to move into Hamburg's visionary new Speicherstadt, now a UNESCO world heritage site.

The company then passed into the hands of the Ellerbrock family of Hamburg merchants, which have owned it for four generations now. The venerable brick building at Pickhuben 9 is still our headquarters.

It has been a long time since barges tied up here and tea was blended on its floors, but the red brick walls still breathe this history. From the outset, its proximity to the port guaranteed direct links to the international trading world. As a result, the decades since its founding were dominated by investment and steady growth at home and abroad.

Historic photograph from a time when Hälssen & Lyon still stored and blended its teas on the warehouse floors

FROM START-UP TO BIG PLAYER

Early on, the tea experts Hälssen & Lyon began establishing an extensive network of partnerships with tea gardens in the origin countries, many of which are still in place today. The global tea markets developed rapidly, and Hälssen & Lyon with them.

We still benefit from these 135-plus years of experience in the business – and so do our customers. From the beginning, we played an active role in the business, becoming a founding member of the German Tea Association, a member of the US Tea Association, the European Tea Association, and the German Herbal and Fruit Infusions Association. All the creative minds who work at Hälssen & Lyon have always preserved the innovative spirit of the long-ago start-up.

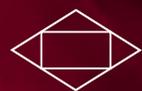

Over the decades we have co-developed sales markets by, for example, advancing the flavouring of teas, developing decaffeinated and instant teas, promoting the use of the pyramid teabag for quality leaf teas, and creating contemporary convenience concepts.

TRADITION OF RESPONSIBILITY

Responsibility – towards our employees, our partners, and to society – is a cherished tradition for us. Four values shape our business policy and are decisive for our future: protecting the environment, sourcing raw materials in accordance with the guidelines of internationally accredited ethical initiatives, our obligation to our employees, and embracing our responsibility to society by sponsoring aid projects and social institutions.

Our business conduct is guided by the principles of the *Global Compact of the United Nations* and the *Code of Conduct of the German Tea Association*. Beyond this, we have developed our own exacting principles and guidelines that obligate us to respect and safeguard human and labour rights, protect the environment and fight corruption.

We seek long-term, close relationships with our suppliers, and put this policy into action through collaborative projects in many growing regions. This gives the suppliers marketing security for their high-quality raw materials and contributes to the producers' long-term economic development while also promoting biodiversity and environmental protection in the growing regions. In Paraguay, for example, we support the *WWF ParLU* (Paraguay Land Use) rainforest conservation project, which manages reforestation projects and sustainable mate farming.

LARGEST SPECIALITY TEA WAREHOUSE

Our tea treasures are no longer stored on historic warehouse floors, but in our state-of-the-art warehouse complex in the Allermöhe district of Hamburg. The high-bay shelves can accommodate up to 25,000 tons of goods, mostly choice tea grades and specialities from all major exporting countries.

The fact that we stock this exclusive diversity for our customers makes our warehouse the world's largest speciality tea warehouse and gives our customers the confidence that we can reliably supply even exceptional teas. We not only offer the largest selection of teas, but have many of them readily available right here, on-site.

TEA WITHOUT END

The inexhaustible variety of teas that the international tea market has to offer is reflected in our unique range of products. We offer our customers teas from all the world's tea regions – from well-known, established tea gardens as well as smaller, up-and-coming partners with exotic-sounding projects that share our high quality standards.

One component in our purchasing policy is contract farming, where selected gardens produce exclusively for us and supply us with the high-quality teas that we can then offer to our customers. Our raw material sourcing always follows ethical guidelines.

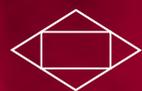

PRODUCT VARIETY

With the diversity of products that we purchase from over 130 countries, we fulfil just about every wish and provide our customers with everything a tea lover's heart could possibly desire: black, green, white and yellow teas, oolong, pu-erh teas, roibos, decaffeinated teas, organic teas and other certified products like Fairtrade, UTZ and Rainforest Alliance, hand-crafted teas, pressed teas and not least a huge variety of flavoured teas.

Add to that a vast selection of high-quality fruits, herbs and spices for the production of individual tea blends.

Today, goods from all over the world are stored in a wide range of containers in our large, modern warehouses

FROM A SINGLE SOURCE

Hamburg is Europe's hub for all things tea. Teas from around the world are received here, and are then shipped from here to all countries again. Every week, numerous containers full of quality teas are unloaded in the cargo port for further refinement and processing at our in-house plant, before they are then shipped to our customers in the international markets.

We serve the needs and requirements of our various customer groups, from specialist tea retailers and tea brands to private-label customers and the beverage as well as food service industries. For us, uniting the "world of tea under one roof" primarily means offering customers a one-stop shop.

From customer-specific tea recipes to teas flavoured in-house, from quick instant mixes and ready-to-drink products to loose bulk teas, to ready-packed cartons of first class tea bags, we offer everything from one source.

A peek behind the scenes of our production site in Hamburg-Allermöhe where the teas are refined in accordance with the highest quality standards

BLENDING, FLAVOURING, PACKING

Our production facilities are designed to prepare and process the sensitive leaf teas with the utmost care for the best homogeneous blends. Working in multiple shifts, our experts can blend up to 150 tons of tea per day.

In flavouring our tea creations, we use sophisticated methods that were introduced to the market by our pioneering tea experts in the 1960s and have been continuously developed since then. At a separate plant, we also process the herbs, fruits and spices which are used in our vast selection of colourful tea blends.

We produce custom-made tea products for individual customers. This also applies to the packaging of teas using our modern packaging equipment.

High-end tea bag solutions, fine tins or convenience systems – we translate our experience and observations of trends in the international markets into innovative packaging solutions

SPIRIT OF INNOVATION

We have a broad “creative pool” that includes our specialist product developers and all the experts from the various departments. Only someone who knows the special properties of teas, herbs and fruits, understands the requirements of certified products, and has distinct skills and expertise in flavouring processes and much more, can develop products that are both innovative and marketable.

Across the years, the company has always been characterised by a love of innovation and new developments. Sometimes that means we have had to wait patiently for the market to be ready to accept the new products.

We intensively worked on the development of convenience solutions such as “teatogo”, the bottling of freshly brewed teas without additives à la ‘brewT’, and the vast variety of extracts, instant powders, premixes and more, very early on, and have continually honed our know-how.

Our knowledge is incorporated into all the tea recipes, concepts and applications that we also develop specifically for individual customers

QUALITY IS KING

The top priority in our work is to ensure quality. It takes precedence at all stages of production at our plant as well as in our purchase negotiations. With continuous checks and tastings, we ensure that the high standard of our offer remains constant.

Our own quality assurance programme guides the selection of our suppliers. We are in close contact with our partners in the origin countries, have them audited regularly, and check the quality of the raw materials from production to delivery – in a certified, reliable and transparent way that can be traced by our customers.

In fact, we guarantee traceability of the finished product back to its source. Sensory and analytical tests are carried out both in our company, as well as by renowned, third-party testing laboratories.

CERTIFICATIONS

We not only comply with our own high internal quality standards, but are also regularly inspected by leading certification programmes from the food industry, whose seals we use for our products.

Our comprehensive quality assurance is substantiated with globally recognised certifications such as IFS, HACCP, etc.

CATALOGUE INFORMATION

- The teas are packaged in 1-kg flavour-sealed bags.
- See page 81 for a scale of special discounts.
- In addition to the specialist retail range in 1-kg bags, we also offer bulk teas from around the world in their original containers, such as bags, boxes and cases.
- Some of the teas will require a statement of nutritional information in future, if they are prepackaged for the end consumer. Please refer to the flyer on the last page of this catalogue for a listing of these teas, including their respective nutritional data.
- **The range of teas featured in this catalogue, further information, photos of the teas and current specials can be found online at: www.HL-teacatalogue.com**

TAGGING

All organically grown teas have to be labelled with this EU logo. Our company is inspected and certified by Lacon GmbH (code no.: DE-ÖKO-003) in compliance with regulation (EC) no. 834/2007. Our control no. is DE-HH-003-00436-BCD.

"Think Tea" – this symbol marks our favourites and recommendations which we feel you shouldn't miss out on.

NEW

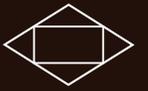

This symbol highlights our new products. It marks new trends and specialities that were carefully created or chosen for you based on our experience and expertise.

We use this symbol to label teas that have been flavoured only with natural flavours. This is especially helpful wherever this is not clearly evident from the list of ingredients or sales description due to food-labelling legislation.

DARJEELING

Black teas from Darjeeling

Darjeeling is one of the most famous tea-producing regions of the world. Grown on the slopes of the Himalayas, Darjeeling teas are of absolute top quality, with a special and elegant flavour that is consistently impressive across all harvests.

At the end of 2011 the EU defined the denomination Darjeeling as a *protected geographical indication* (PGI). Accordingly, teas from Darjeeling produced in compliance with the regulation can be labelled on the packaging either with the words *protected geographical indication* or the EU Logo. Please note that the EU label has a very specific appearance (colour, size etc.). Teashops that sell loose, not pre-packed teas can label the storage tins with the text or logo.

DARJEELING FIRST FLUSH

In March, after the winter lull, the first tender shoots are harvested in the mountains. The most expressive and delicate early teas are flown out by plane and are therefore available in specialist shops as early as the beginning of April. The teas shipped by boat arrive just a few weeks later. These teas from the spring picking in March and April are characterised by a light, glowing cup, a fresh, flowery flavour, lively character, intensive fragrance and delicate leaves with green tips.

- S1055 Darjeeling Himalayas Blend**
 – *Black Tea* –
 Crisply floral, aromatic and flavourful, this is a harmonious blend of spring teas from well-known Darjeeling gardens. It contains lots of tips and produces a light infusion.
- S1004 Darjeeling First Flush FTGFOP1 House Blend**
 – *Black Tea* –
 Typical batches from the first picking period are blended and offer great value for money. A tea for every day, all year long. Stimulating, full of flavour, with a golden brown cup.
- S1002 Darjeeling First Flush FTGFOP1 SELECTION organic**
 – *Black Tea* –
 Picked out for you every year by our tea tasters. Offer yourself a treat from a garden that particularly impressed us this year, with a tea that has a bronze cup, even leaves and a delicate fragrance.
- S1005 Darjeeling First Flush TGFOP1 SOOM**
 – *Black Tea* –
 A very typical tea from the first picking. Premium quality with a honey-coloured and full-bodied infusion, it is a stimulating tea to kick off the day and for breaks throughout the day.
- S1003 Darjeeling First Flush SFTGFOP1 PUTTABONG organic**
 – *Black Tea* –
 The Puttabong garden successfully adopted organic production quite some time ago. Year in, year out, it produces characteristic, expressive teas. This crisp tea from the spring picking is flavourful, floral, delicate and has a light infusion.

S1006 Darjeeling First Flush FTGFOP1 MONTEVIOT organic

– Black Tea –

One of the smallest and oldest tea gardens in Darjeeling produces this organic tea with lots of tips and well-worked leaves. A premium tea with a full infusion and an aromatic, gold-coloured cup.

S1001 Darjeeling First Flush FTGFOP1 JUNGPARA (upper)

– Black Tea –

This is an outstanding, crisp and harmonious tea from one of the best tea gardens, characterised by a pleasantly flowery bouquet. It addresses all the senses. Magnificent fragrance for the nose, tangy flower for the palate, and a lively leaf with lots of tips.

S1076 Darjeeling First Flush SFTGFOP1 CASTLETON

– Black Tea –

At altitudes reaching 1,500 meters, the small but excellent Castleton tea garden produces first class teas. This outstanding, magnificent first flush is intensely flowery and fragrant, elegant and has a lasting flavour. The delicately worked leaves are interspersed with green tips and seduce with their spring freshness.

S1001

S1010

DARJEELING SECOND FLUSH

By the time the second flush is picked in the summer months of June and July, both the taste and the look of the teas have changed considerably. The buds and tips are now a silvery or golden-brown colour, while the colour in the cup ranges from coppery-gold to auburn. Mature second flush teas of high quality are full-bodied and have a slightly nutty flavour. The top teas possess the prized muscatel character but are very hard to find nowadays.

DARJEELING IN BETWEEN

S1007 Darjeeling FTGFOP1 „In Between“ BADAMTAM

– Black Tea –

In the short space of time between the delicate first flush and the mellower second flush the so-called “in between” teas are produced. They combine the crispness of the spring picking with the maturity of the summer picking.

S1009 Darjeeling Second Flush FTGFOP1 House Blend

– Black Tea –

This harmonious blend of second flush teas from carefully selected gardens produces a strong and full-bodied infusion with a nut-brown cup.

S1078 Darjeeling Second Flush TGFOP1 NAMRING UPPER

– Black Tea –

Strong, substantial tea from the second picking with a dark cup and a full body. It can be enjoyed any time of the day, sweetened or not, with milk or without, whichever way you prefer.

S1010 Darjeeling Second Flush FTGFOP1 SUNGMA organic

– Black Tea –

An organically produced Darjeeling full of flavour. This tea is picked late in summer and has large, regular, multicoloured leaves. It is very satisfactory with its mild, nutty flavour and a copper cup.

S1013 Darjeeling Second Flush FTGFOP1 SINGELL organic

– Black Tea –

This organic tea is characterised by its full-bodied, balanced cup. A very pleasing tea with an auburn, glowing infusion and even leaves with quite a few tips.

S1014 Darjeeling Second Flush FTGFOP1 AMBOOTIA organic

– Black Tea –

A good many years ago Ambootia was one of the first plantations to change to organic production. Its first class teas stand out with consistently high quality through all picking seasons. This second flush tea was picked under perfect climatic conditions and gently processed. That produced a full-bodied, slightly tangy and subtly nutty infusion with a lovely fragrance and a glowing cup.

S1008 Darjeeling Second Flush FTGFOP1 RISHEEHAT organic

– Black Tea –

Typical for this full-bodied and well rounded summer tea are the silvery tips in the delicately worked leaves, the dark, mahogany-coloured cup and the mature muscatel character. A delightful tea that is perfectly suited for the afternoon.

S1077 Darjeeling Second Flush SFTGFOP1 HAPPY VALLEY organic

– Black Tea –

A wonderful, complete tea that proves that second flush teas, too, can be very exciting. The multicoloured leaves are as typical for this tea as the nut-brown cup with its rich burst of flavour and a well-balanced touch of muscatel. For tea aficionados. Our close partnership with the Happy Valley garden enables us to offer select teas like this one on an exclusive basis.

DARJEELING AUTUMNAL

S1015 Darjeeling FTGFOP1 MARGARET'S HOPE

– Black Tea –

After the monsoon in late summer the so-called autumnals are picked. This is a mild, delicately flowery tea from the well-established Margaret's Hope garden that unites fresh green shoots with brownish autumn coloured leaves.

S1092 Darjeeling SFTGFOP1 Pandam Winter Tea organic

– Black Tea –

A tea from a nearly forgotten, rediscovered estate. The aroma impresses with a natural orange-citrus note, aromatic and elegant. A tea for the quiet hours of the day.

Our green tea from Darjeeling is introduced on page 36

S1081

ASSAM

The Assam plateau in the Northeast of India is situated on both sides of the Brahmaputra River and is the largest contiguous tea-growing area in the world. Here, some 2,000 gardens produce strong, powerful and spicy teas. The region's premium teas seduce connoisseurs with their characteristic malty flavour. Typical features for Assam teas are the golden tips and (depending on the grade) a more or less 'creamy' cup. Assam teas are often used in strong blends such as English Breakfast. Particularly important and sought after are the second flush teas, which possess all the typical characteristics of good Assam teas. Good, 'long-lasting' first flush Assams are rare because they tend to lose their flavour fairly quickly.

ASSAM LEAF TEA

S1021 Assam TGFOP1 MAHALUXMI

– Black Tea –

A classic Assam with a smooth flavour and a regular leaf.

S1020 Assam SFTGFOP1 HARMUTTY

– Black Tea –

This is a pleasantly spicy leaf tea with a lot of golden tips and a finely worked leaf.

S1019 Assam TGFOP1 BUKHIAL

– Black Tea –

Strong, flavourful and rich with a dark cup and intensive spice, this tea has finely worked golden-tipped leaves. It is particularly good with a touch of sweetness and/or a dash of cream.

S1017 Assam TGFOP1 First Flush

– Black Tea –

A round Assam from the first picking that is smooth enough to remind one of the character of a Darjeeling yet is still strong and flavourful.

S1079 Assam TGFOP1 JAMGURI organic

– Black Tea –

This organic garden time and again manages to impress us with its excellent and characteristic teas. A finely worked Assam leaf tea picked at the height of the summer harvest. The rich, auburn infusion seduces with its fullness and elegant, distinct flavour.

S1018 Assam SFTGFOP1 MANGALAM

– Black Tea –

The Mangalam garden produces this spicy, malty Assam with an evenly worked, fleshy, golden-tipped leaf. It has a beautifully unfolding full flavour with a rich, elegant cup.

S1080 Assam SFTGFOP1 HALMARI

– Black Tea –

Multicoloured, golden tipped leaves and a rich, long-lasting spicy flavour mark this full-bodied, deliciously malty Assam. A classy tea for the connoisseur with a glowing, copper red cup which is low in tannins.

ASSAM BROKEN TEA

- S1024 Assam CTC BOP BORSILLAH**
– *Black Tea* –
An Assam tea processed by machines with the CTC method (crushing/tearing/curling). The copper brown nodular leaves produce a strong, intensive infusion.
- S1023 Assam GFBOP1 HAJUA**
– *Black Tea* –
Simple, yet strong, a Broken Assam with a dark cup and a full body. It unfolds nicely with an added touch of sweetness.
- S1022 Assam FBOP MORAN Broken**
– *Black Tea* –
Lovers of strong, flavourful black teas will like this rough, Broken Assam with golden tips and a dark, creamy cup.
- S1025 Assam TGBOP SEWPUR organic**
– *Black Tea* –
The Sewpur garden produces organic teas of the highest standard with a full body and a well worked leaf. This Broken Assam with golden tips is spicy and malty and has a very dark cup.
- S1081 Assam Malty FTGBOP1 MANGALAM**
– *Black Tea* –
This tea surprises with its fullness and great elegance. A top location and perfect harvest time guarantee a rich, full-bodied black tea with a distinct malty note and a long lingering flavour. A tea lovers' tea for any time of the day; it is particularly delicious sweetened or with pastry.

Our Assam green tea is introduced on page 36

CEYLON

The six tea-growing areas of Sri Lanka (still called Ceylon in tea circles) are grouped around Adam's Peak. The most important teas come from the highland regions of Uva, Dimbula and Nuwara Eliya, and grow at altitudes of over 1.200 meters. The teas from these regions are particularly sought after because the slow growth of the tea leaves produces an especially smooth and intensive flavour. Dimbula is the tea-growing area in the west. Its teas have a delicate and floral flavour. The best teas of this area are picked from January to March. Uva is also located in the highlands and produces strong, full-bodied teas. The top grades here are picked from July to September. The high plateau of Nuwara Eliya is regarded as the cradle of the finest and best Ceylon teas. It is located between Dimbula and Uva, and top grades are picked here all year round.

CEYLON LEAF TEA

- S1032 Ceylon OP PETTIAGALLA**
– *Black Tea* –
From Dimbula, one of the oldest and best known growing areas of Sri Lanka. This classic OP (Orange Pekoe) has a long leaf, is spicy and flavourful.
- S1027 Ceylon OP DIMBULA**
– *Black Tea* –
A characteristic Ceylon Orange Pekoe that has a long, gray and very wiry leaf. The infusion delights with its round and pleasant bouquet and a light cup.

S1034 Ceylon OP KENILWORTH

– Black Tea –

This classic Dimbula is grown in a top location and picked at the height of the area's harvesting season in February. It has a neatly worked, short and wiry leaf, a spicy and round flavour and a reddish brown infusion.

S1030 Ceylon OP WEWESSE

– Black Tea –

A very typical tea from the Uva province. The top harvesting time in August produces a highly flavourful, delicately spicy tea with a grey-brown leaf and a nicely unfolding flavour.

S1029 Ceylon OP NUWARA ELIYA

– Black Tea –

The region with the highest tea gardens in Ceylon is home to this full-bodied tea with a wiry leaf and a copper red infusion. A mild tea for the afternoon, low in caffeine and tannins.

S1035 Ceylon FOP SILVER KANDY

– Black Tea –

Lots of carefully picked silvery tips mark this elegant tea which is produced in the most northerly and oldest growing area, Kandy. A delight for all lovers of strong teas. It has a dark infusion with a strong, round and malty flavour.

S1036 Ceylon OP BLACKWOOD organic

– Black Tea –

This garden in Uva produces top-quality organic and very characteristic Ceylon teas with a copper cup and tippy leaves. A pronounced, highly flavourful tea picked at the best harvesting time in July.

CEYLON BROKEN TEA

S1028 Ceylon Pekoe LOVERS LEAP

– Black Tea –

Lovers Leap is a high-lying garden in the Nuwara Eliya district which produces consistently good quality teas all through the year. This Pekoe with slightly uneven, small leaves is highly flavourful with a full body and is picked in spring.

S1031 Ceylon BOP UVA HIGHLAND

– Black Tea –

A richly flavourful, strong and spicy Broken tea from the Uva summer picking. It has a bright copper cup and develops its character best with a touch of added sweetness.

S1035

S1031

CHINA

China Black Tea

The vast realm of China, where the growing regions are at great distances from one another, produces a wide variety of black teas with entirely different flavours: mild and delicate, slightly sweet and fragrant, strong and earthy – and often with a discernible smoky nuance.

S1037 China KEEMUN CONGOU

– Black Tea –

From the Anhui region comes this round and mild tea. It is low in tannins and appeals particularly to first time tea drinkers.

S1038 China KEEMUN LUXUS CONGOU

– Black Tea –

Well-composed and elegant, this Keemun tea from Anhui has a sweetish, spicy note and a slightly tart flavour. A great pleasure, low in caffeine and tannins.

S1083 China KEEMUN HAO YA

– Black Tea –

Also from the Anhui province comes this rare tea with an elegant leaf and an abundance of golden tips. It is aromatic, floral, subtle and sweetly fruity with a clear, hazel infusion. A mild, select speciality, only a small quantity of which is available for sale.

S1039 China YUNNAN FOP

– Black Tea –

A black tea from the Yunnan region with even leaves and some golden tips. The pitch-dark infusion and the slightly earthy character are very typical for Yunnan teas.

S1085

S1090 China GOLDEN YUNNAN organic

– Black Tea –

This very characteristic black tea comes from the high regions of Yunnan. It is from organic production and has a well worked leaf with golden brown tips. The flavour is sweetish-spicy and softly earthy, the cup dark and strong.

S1085 China FINEST TIPPY GOLDEN YUNNAN

– Black Tea –

Also from the southern Chinese district of Yunnan comes this tea. It has a lot of golden tips and a delicately spicy, slightly smoky and earthy touch and a strong, dark infusion.

S3018 China PU ERH Tea

– Specially Fermented Tea –

The Pu Erh tea, too, comes from Yunnan. Also called “red” tea for the colour of its cup, it is a “postfermented” tea with a characteristic earthy, slightly sweetish flavour and has a very intensive, rather pungent smell. Like green tea it should be prepared with not quite boiling water (90 degrees) and can be reinfused several times.

S3051 China PU ERH Mini TUO CHA

– *Specially Fermented Tea* –

This long-living, pressed Pu Erh tea was formed into small nests sufficient for about 500 ml. Shortly douse the nests with boiling water and pour away the liquid. Then, for the “real” infusion, pour boiling water and let brew for 60 seconds at most. Try infusing several times!

Weight per unit about 4 g.

S1086 China ORGANIC PU ERH Tea „ROYAL PALACE“

– *Specially Fermented Tea* –

A very special variety, organically produced in the Yunnan province. After the actual fermentation the finely worked leaves are again moistened to start postfermentation. Storing the tea afterwards for several months guarantees the expressive character with the typical earthy, slightly sweetish note, the full body and the dark, reddish cup.

S3051

S3028

SCENTED BLACK TEA

Just like tea itself, “flavouring” has its origins in China. In tea gardens where shade trees spread their fragrance it was noted that tea leaves which had taken on the delicate scents were particularly appreciated. That is the origin of rose tea and green jasmine tea, amongst others. Fresh flower petals are added to the dried tea leaves and impart their scent to the tea. Afterwards the petals are removed and the process repeated until the fragrance has reached the desired intensity. The last batch of blossoms is generally left in the tea for an attractive look.

S3029 China LICHEE CONGOU

– *Flavoured Black Tea* –

A delicate Chinese black Congou tea paired with the flavour of the lychee fruit. A special treat.

Ingredients: black tea, flavouring

S3028 China ROSE CONGOU

– *Flavoured Black Tea* –

This black Congou contains rose petals and derives its aroma from freshly picked roses which delicately transfer their scent to the tea.

Ingredients: black tea, rose petals, flavouring

S3031 China TARRY LAPSANG SOUCHONG Smoked Tea

– *Black Tea* –

Not the usual “two leaves and a bud” are picked for this special tea but thicker and larger leaves from lower down the tea bush. Smoking it over exotic woods gives it its typical flavour.

Ingredients: black tea, smoke

OTHER CULTIVATION AREAS

HIMALAYA BLACK TEA

S1045 Golden Nepal FTGFOP1 MALOOM

– Black Tea –

This tea garden at high altitude is still fairly young. It produces very flavourful, slightly fruity teas. A Golden Nepal from the summer harvest, mature, low in tannins and with lots of tips. A nice alternative even for Darjeeling aficionados.

S1046 Nepal TGFOP SHANGRI-LA organic

– Black Tea –

The slightly sweetish character of Nepal tea marks this spicy organic tea from the late summer picking that makes a very pleasant afternoon tea.

S1093 Nepal GOLD SHANGRI-LA organic

– Black Tea –

This organic black tea comes from a premium tea plantation in Nepal. Its beautifully shaped leaf has many golden tips, and its aroma captivates with a flowery, chocolaty note. A tea for special times.

You will find our Nepal green tea on page 36

S1093

S1044 Sikkim FTGFOP1 TEMI

– Black Tea –

A truly “royal” tea from Temi, the only plantation in the former kingdom of Sikkim, now the most northerly Indian state. The garden produces teas with a distinctive, fruity character. This tea from the late first flush picking convinces with its elegant flavour, its full body and the finely worked leaf.

SOUTH INDIA BLACK TEA

S1051 Nilgiri TGFOP1 THIASHOLA organic

– Black Tea –

A leaf tea from organic production. The plantation Thiashola lies in the highlands of Nilgiri in southern India and produces pleasantly light and flavourful teas.

INDONESIA BLACK TEA

S1087 Sumatra Broken

– Black Tea –

Broken teas from the Indonesian peninsula Sumatra are not only perfect for East Friesian or breakfast blends but, on their own, are strong and satisfying everyday teas as well. Because of the low tannin content this tea will not turn bitter and is therefore very good for making ice tea.

S1047 Java OP MALABAR

– Black Tea –

The tea from the Indonesian island Java has a flavourful, slightly sweetish cup. A perfect afternoon tea, low in caffeine and tannins.

AFRICA BLACK TEA

S1088 Tanzania Golden Flowery LUPONDE organic

– Black Tea –

This leaf tea from orthodox production is pleasantly mild yet very flavourful and is an excellent everyday tea.

S1070 African Nature BOP

– Black Tea –

An excellent, strong African Broken from the best growing areas. It is spicy with a pleasant flavour.

S1049 Kenya GFBOP1 MARINYN

– Black Tea –

Whilst large amounts of Kenyan tea come from CTC production, we can offer you an orthodox Broken, mild and with a strong flavour.

S1048 Kenya GFOP1 MARINYN

– Black Tea –

This orthodox leaf tea from the foot of mount Kilimanjaro contains lots of white tips and is pleasant and spicy with a copper cup.

S1094 Rwanda OP RUKERI organic

– Black Tea –

This strong and aromatic organic tea grows in the highlands of Rwanda. A copper-brown colour in the cup and a well-formed leaf are typical for this elegant tea.

DECAFFEINATED TEAS

These teas are decaffeinated using a high-pressure CO₂ process without solvents. This gentle processing allows the original flavour of the tea to be preserved to a large extent.

S3032 Darjeeling* Second Flush Leaf Decaf

– Decaffeinated Black Tea –

For all those who do not want to miss out on their black tea but who do not always want the stimulating effect of caffeine. A Second Flush Darjeeling*, gently decaffeinated (CO₂ process). The characteristic Darjeeling* flavour is largely preserved. (* protected geographical indication)

S3033 Ceylon Leaf Decaf

– Decaffeinated Black Tea –

This spicy tea combines the typical strong character of Ceylon with the advantages of a decaffeinated tea. The wiry leaf produces a savoury and mild infusion.

S1094

BLACK TEA BLENDS

- S3034 Earl Grey Leaf Decaf**
– *Decaffeinated Flavoured Black Tea* –
A decaffeinated Ceylon leaf tea nicely finished with bergamot flavouring. For all lovers of Earl Grey who do not want too much “excitement”.
Ingredients: black tea, flavouring
- S3035 China Sencha Green Tea Decaf**
– *Decaffeinated Green Tea* –
Green tea lovers are offered this decaffeinated alternative. The characteristic, crisply acerb, slightly hay-like taste of Sencha is clearly discernable.
- S5056 Sencha Lemon Decaf**
– *Lemon Flavoured Decaffeinated Green Tea Blend* –
Ingredients: decaffeinated China Sencha green tea, lemon peel, sunflower petals, flavouring, cornflower petals

- S1053 East Friesian Broken Blend**
– *Black Tea Blend* –
For those who want it particularly strong, this East Friesian Broken blend is just perfect. A well-composed blend of spunky Assam Broken teas and strong Sumatra Broken goes into making the national drink of the East Friesians. This tea calls for the addition of rock sugar and cream to make it a perfect delight.
- S1052 East Friesian Leaf Blend**
– *Black Tea Blend* –
Strong Assam teas with elegant leaves and golden tips produce a dark, strong, full-bodied and spicy infusion. A perfect setup for the typical East Friesian tea time. Add a lump of rock sugar, maybe a dash of cream ...
- S1054 East Friesian Sunday Tea**
– *Vanilla Flavoured Black Tea Blend* –
A delicious Assam, harmoniously blended with pieces of vanilla, is the right choice for festive occasions.
Ingredients: black tea, vanilla pieces, flavouring
- S1058 English Breakfast**
– *Black Tea Blend* –
A delicious Broken blend after a typical English recipe. Ceylon teas from select gardens join for a harmonious blend which is a pleasure not only in the early morning.

S1089

S1059 English Highlands Leaf Blend

– *Black Tea Blend* –

The companion through the whole day. Leaf teas from all over the world are successfully united and are particularly good with milk or lemon.

S1062 Five o’Clock Tea

– *Black Tea Blend* –

A mild Broken blend low in caffeine and tannin content after an English recipe. It is full-bodied, sweetish and a lasting delight.

S1060 Irish Breakfast Tea

– *Black Tea Blend* –

Quite a strong Broken blend which works to perfection with milk and sugar. Teas from Assam and Sumatra make a truly delightful tea for the early morning.

S1089 Early Morning Broken Tea organic

– *Black Tea Blend* –

Typically British and beautifully full-bodied, this Broken blend is from organic production. Stimulating yet mild, flavourful, with a reddish-brown cup and a strong body.

S1056 Russian Blend

– *Black Tea Blend* –

This blend is produced after an old recipe. It has a slightly smoky note and can be used in a samovar.

S1061 Hälsen & Lyon „Tradition“

– *Black Tea Blend* –

A well-composed blend of black leaf teas from all over the world. Made from a traditional recipe, it is a perfect delight for all lovers of black tea.

S1055 Darjeeling* Himalayas Blend

– *Black Tea Blend* –

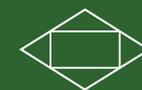

Crisply floral, aromatic and flavourful, this is a harmonious blend of spring teas from well-known Darjeeling* gardens. It contains lots of tips and produces a light infusion. (*protected geographical indication)

S1060

GREEN TEAS

S2016

CHINA

The better part of all green tea produced worldwide comes from China, the “motherland” of tea. Green teas – unlike black teas – are not fermented. The colour of the leaves varies from light green and shiny silver to a dark emerald green, the infusion is light. Depending on the type of tea and the preparation, the flavour ranges from slightly tart to pleasantly sweetish and aromatic.

In general, green teas are not prepared with boiling hot water, instead the water is allowed to cool down to the desired temperature. Recommendations for the preparation of green tea are as manifold as the tea leaves, growing areas and processing. Depending on the type of tea and personal preference, the recommended water temperature ranges from 70 to 90 degrees Celsius and the brewing time from one to three minutes. The rule of thumb is: the better the tea, the lower the water temperature and the longer the brewing time.

Green teas should definitely be infused several times. Many tea lovers particularly prefer the second and third infusion. But this, too, is a question of preference and tips on this subject fill many a guidebook.

S2001 **China GUNPOWDER**

– Green Tea –

The leaves of this green tea classic are rolled into tight pellets. Its flavour is refreshing and tangy, the cup medium light.

S2005 **China SENCHA**

– Green Tea –

A mild and gentle green tea with a slightly hay-like flavour. Its leaves are long and pressed flat, the infusion is light yellowish-green.

S2002 **China CHUN MEE**

– Green Tea –

This flavourful green tea with an evenly rolled leaf is slightly tart and has a peach-coloured cup. For all green tea aficionados.

S2003

S2010 **China SENCHA organic**

– Green Tea –

An organic Sencha from the southeastern Chinese province of Zhejiang. It is characterised by a pressed leaf and a pleasantly grassy note with a yellow-green cup.

S2004 **China GREEN DRAGON**

– Green Tea –

From the southern Chinese region of Yunnan. The wavy, light green leaf produces a fresh, clear, unobtrusively strong infusion.

S2003 **China MOON PALACE**

– Green Tea –

A premium Chun Mee that captivates with its carefully picked and processed leaf and the elegant floral flavour.

S2009 **China CHUN MEE organic**

– Green Tea –

This fine, organic Chun Mee comes from the Wuyuan region in the Jiangxi province. The leaves are slightly curved, the infusion is light with a fresh, slightly tart flavour.

S2008 China GUNPOWDER organic

– Green Tea –

This organic tea is characterised by its slightly tangy and refreshing flavour. It has a rolled leaf and is produced in the Wuyuan area in the Jiangxi province.

S3013 China YUNNAN Green TGPOP

– Green Tea –

A handpicked tea with lots of silvery tips. The infusion is mild and flowery, with a long-lasting flavour and a peach-coloured cup.

S3035 China SENCHA Green Tea Decaf

– Decaffeinated Green Tea –

The decaffeinated alternative for green tea lovers. The characteristic, crisply acerb, slightly hay-like taste of Sencha is clearly discernable.

S2021 China Mountain Mist WU LU

– Green Tea –

The southeastern Chinese province of Zhejiang is the home of this expressive mountain mist tea. Its name is composed of Wu = mountain mist and Lu = green bud. The emerald green, thoroughly twisted leaf produces a delicately flowery, slightly sweetish and highly flavourful infusion and is appreciated particularly for its refreshing character.

S2006 China (Mao Feng) CRISS CROSS

– Green Tea –

Because of its irregularly formed leaves this Mao Feng is also known as Criss Cross. A jade green cup and a soft, slightly sweet flavour are characteristic of this green tea.

S2021

S3013

S3014 China PI LO CHUN

– Green Tea –

The jade green “Spiral of Spring” is a very elegant, hand-picked and carefully processed green tea with an abundance of white tips and a delicately twisted leaf. A great delight with its lively freshness, a hint of sweetness and the clear, light cup.

S3009 China MAI FENG

– Green Tea –

A crisp, slightly tart spring tea from the eastern Chinese province of Jiangsu. The spiky, slightly twisted and lushly green leaf produces a jade green, aromatic infusion with a fruity note.

S2018

CHINA – SCENTED GREEN TEA

Green teas enhanced with the addition of flowers are a typical Chinese speciality and the precursor of flavoured teas. Finished, unfermented and dried green tea is blended with fresh flower petals, which are removed and replaced with fresh ones several times. The delicate green teas take on the fine scent of the flowers in a gentle, natural way. For top-quality teas this process is repeated more often, so that the scent is more pronounced than in more ordinary varieties. Incidentally: The amount of flowers visible in the finished product is not an indicator of the intensity of the flowery note – they are left in the tea merely for an attractive look. Some premium teas are sold without any petals, leaving a plain green tea without any visual evidence of flowers but a very intensive flavour!

S2018 **China PALACE NEEDLE organic**

– Green Tea –

The Chinese province of Hubei is the birthplace of this organically produced tea speciality. Only the most delicate shoots and tips are picked very carefully and then gently processed. Not only professed green tea lovers will be delighted by its dark green shiny leaf and the aromatic light cup with its delicate subtlety and sweetness.

S3006 **China GU ZHANG MAO JIAN**

– Green Tea –

This handpicked tea with fine, curly leaves and white tips, from the Chinese province of Wuhan, will seduce you with its extravagant, slightly smoky character and the golden yellow cup.

S3005 **China LUNG CHING (LONGJING) Second Grade**

– Green Tea –

Perfect climatic conditions in the southeastern Chinese province Zhejiang allow for the production of this famous green tea speciality. Also known as “Dragon Well Tea”, this classic has a long, flat leaf, a jade green cup and an elegant, mild and delicate flavour.

S3026 **China JASMINE CONGOU**

– Green Tea –

This jasmine classic comes from the Chinese Fujian province. The added blossoms are a delight for the eyes but even more so for the palate. Mild, with a medium-light cup.
Ingredients: green tea, jasmine flowers

S3027 **China JASMINE CHUNG HAO**

– Green Tea –

A jasmine tea speciality from the Chinese Fujian province. The elegant green tea with neatly worked leaves and a lot of white tips gives off a sweet, long-lingering scent of jasmine.

S3047 **China JASMINE CHUNG FENG organic**

– Green Tea –

This organically produced jasmine tea has delicately worked leaves and lots of white tips. At the end of processing all jasmine flowers are removed, preserving the subtle lightness of the tea.

S3007

KOREA

Green tea specialities from South Korea are not only recommended as an alternative to Japanese green teas but also just add variety for all lovers of green tea. The small island of Jeju, off the southern coast of the Korean mainland, is a UNESCO World Heritage Site. Its humid subtropical climate with annual precipitation exceeding 1800 mm and the nutrient-rich volcanic soil offer perfect conditions for the production of excellent, organically grown teas.

Most teas from this area are produced according to the traditional Korean roasting procedure. This method preserves the original structure of the leaf. An exception is Jeoncha, which involves steaming according to the Japanese method and pressing the leaf like Sencha.

S3007 **China JASMINE DRAGON PHOENIX PEARL**

– Green Tea –

Small jasmine pearls, a rare speciality from China. Only the youngest and most tender leaves are repeatedly blended with fresh, very fragrant jasmine flowers which are removed afterwards. Then the scented tea leaves are rolled by hand into small, tight pearls. The jasmine aroma is closed in and unfolds fully when infused. A pleasure for the eyes, nose and palate. The amber cup and the fantastic fragrance are extremely seductive!

Ingredients: green tea, jasmine petals

S3030 **China SWEET OSMANTHUS**

– Green Tea –

The southern Chinese Guangxi province which borders on Vietnam is the home of this green tea speciality. It is blended with osmanthus flowers and has taken on their sweet, peach-like aroma.

Ingredients: green tea, osmanthus flowers

S2025 **Korea MYSTIC GREEN organic**

– Green Tea –

A tea with a light, elegantly sweet aroma, distinguished by its jade-green leaves and colour in the cup. A special treat for green tea lovers.

S2023 **Korea JOONGJAK organic**

– Green Tea –

The name of this tea translates as “picked in the middle of June”. It is a second flush tea and is roasted according to Korean tradition. The slightly twisted leaf captivates with its bright green colour. The clear lemon yellow infusion has a fresh, fruity flavour and a smooth aroma.

S2024 **Korea JEONCHA organic**

– Green Tea –

This second flush tea is picked at the end of June and the name can also be translated as Sencha. Like Japanese green teas it is steamed and the longish leaf is pressed flat. The vivid green of the cup emphasises the fresh and bright flavour. A perfect choice for all fans of Sencha and lovers of green tea in general.

S2023

JAPAN

Teas from Japan are nearly all green and unfermented. The best-known variety is Sencha, Japan's everyday tea, which is available in a variety of different grades. As the soil has a fairly high iodine content, a subtle taste of seaweed is characteristic for Japanese teas.

Concerns that all Japanese teas might be contaminated in the wake of the 2011 Fukushima nuclear disaster have fortunately been disproven. In any event, all Japanese teas undergo intensive controls. After strict examinations in the tea gardens and upon leaving Japan, the goods are tested for radiation yet again on entering the EU.

S2016 **Japan GENMAICHA**

– Green Tea –

A Bancha, naturally low in caffeine content. The addition of roasted brown rice gives it a slightly tart, aromatic cup with a roasted flavour.

Ingredients: green tea, roasted rice, puffed rice

S2015 **Japan BANCHA HOJICHA**

– Green Tea –

Roasting gives this Bancha its special flavour. The leaves are brown and produce a light brown cup.

S2014 **Japan BANCHA**

– Green Tea –

Bancha is harvested from the same bushes as Sencha but in this case the lower, larger leaves are picked. This voluminous tea with large, flat pressed leaves is naturally low in caffeine and has a mild, pleasant flavour. Very good for first time green tea drinkers.

S2013

OTHER GROWING AREAS

GREEN TEA FROM DARJEELING

- S1016 Green Tea KGPOP1 RISHEEHAT organic** 
 – Green Tea –
 An organically produced green tea from one of the best-known plantations in this region that combines the character of Himalayan teas with the freshness of green tea. It comes from the early summer harvest and is distinguished by a great fullness and elegance.

GREEN TEA FROM ASSAM

- S1026 Assam FTGFOP SEWPUR organic** 
 – Green Tea –
 This unfermented green Assam is processed after a traditional method for producing green tea. It is strong and full of flavour.

GREEN TEA FROM NEPAL

- S2026 Nepal Green EMERALD GUARANSE organic**  **NEW**
 – Green Tea –
 Fine, needle-like leaves with white tips are characteristic of this exquisite tea. Flowery, aromatic with a typical green tea note in the cup.

GREEN TEA FROM AFRICA

- S2027 Rwanda OP RUKERI organic**  **NEW**
 – Green Tea –
 A select organic green tea from the highlands of Rwanda. The regular-shaped leaf, its emerald green colour and elegant aroma characterise this tea.

- S2011 Japan SENCHA FUKUJYU**
 – Green Tea –
 Translated, Sencha means “steamed tea”. This mechanically harvested Sencha also was steamed to prevent fermentation. The taste reminds of seaweed and has a slightly tart, distinct and fresh note, the cup is a light olive.

- S2020 Japan SENCHA UCHIYAMA organic** 
 – Green Tea –
 An excellent green Sencha from the first spring harvest, organically produced in the Uchiyama region. Its glowing, golden infusion and the lively, flowery flavour are a particular delight.

- S2013 Japan GYOKURO ASAHI**
 – Green Tea –
 A Japanese rarity which roughly translates as “jewel dew”. About two weeks before the harvest the tea bushes are covered with bamboo mats. The “shadow tea” develops less tannin, has a distinctly higher caffeine content and the leaves are a very dark green and slightly shiny. In Japan Gyokuro is served especially to honour guests. It has an elegant, subtle, yet strong flavour with a touch of sweetness.

- S2017 Japan MATCHA organic**  /tin
 – Green Tea –
 This pulverised green tea is a Japanese classic and is still prepared in a special way in the traditional tea ceremonies. Sold in units of six tins of 30 g each.

WHITE TEAS & OOLONGS

S3045

WHITE TEAS

White teas are amongst the noblest and mildest varieties in the world. To produce them only the youngest, unopened buds, still covered by a silvery down, are picked and briefly withered in natural daylight. Afterwards the buds are heated for a short time and then air-dried.

S3002 China YUNNAN WHITE DRAGON

– *White Tea* –

From the district of Yunnan comes this white tea which is picked very young and carefully processed. The white down on the many buds and the underside of the leaves, the light, aromatic cup and the delicate, floral character leave nothing to be desired.

S3001 China White Tea PAI MU TAN

– *White Tea* –

This variety is one of the best known, most popular white teas and has a large, open leaf with a pleasant, mild character.

S3045 China WHITE WINGS organic

– *White Tea* –

Yunnan is the region where this perfectly picked and processed white tea originates from. It depicts the plucking method “two leaves and a bud” to perfection. Comparable in look and taste to a top Pai Mu Tan the White Wing offers a flowery, fragrant experience and for all its delicateness is still full-bodied.

S3003 China WHITE SNOW BUD

– *White Tea* –

Only young buds and open leaves are harvested for this handpicked tea. That makes for a very light, ivory-coloured infusion and a mild, elegant flavour.

S3046

S3004 China WHITE MONKEY PEKOE

– *White Tea* –

Originally, grown only in high altitudes in Fujian, this tea got its name from the fact that it was picked by monkeys particularly trained for this purpose. Nowadays it is picked by human hands in a period of only a few days per year. The roughish, slightly downy leaf produces a light-green, smooth cup with a slight note of honey.

S3046 China YIN ZHEN SILVER NEEDLE

– *White Tea* –

For this unique speciality from the Chinese district of Fujian only unopened buds are picked and processed. If possible, this tea should be infused in a glass pot. After a short time something terrific starts to happen: The silvery leaves sink to the bottom and shortly afterwards straighten up and “stand” erect. An exciting, velvety-soft and delicate flavour paired with an ivory-coloured, fragrant infusion. An enchanting experience.

S3053

OO LONG

In Chinese, Oolong means “red dragon”. These semi-fermented teas come mostly from south-eastern China and Taiwan. They have a sweetish taste, and premium varieties also boast an elegantly floral, peach-like note.

S3022 China OOLONG SE CHUNG

– *Oolong Tea* –

Typical for this semi-fermented Oolong is its slightly rolled dark green leaf. A mild, pleasant tea with an aromatic, slightly nutty flavour and a golden-brown cup.

S3023 China OOLONG TI KUAN YIN

– *Oolong Tea* –

This delicately semi-fermented Oolong from the Chinese province of Fujian convinces with its tightly rolled leaf, jade-green cup and natural fruity sweetness.

S3025 China OOLONG organic

– *Oolong Tea* –

A relatively rough, typically reddish brown, “open” leaf and a slightly earthy, yet light flavour characterise this organically grown tea. It is mild, with a low tannin content.

S3042 China MILKY OOLONG

– *Flavoured Oolong Tea* –

This is an unusual tea from China. Flavouring is added to the fresh tea leaves at origin. A sweetish flavour reminiscent of milk.

Ingredients: Oolong tea, flavouring (contains **milk products**)

S3052 China High Mountain PAO CHONG OOLONG organic

– *Oolong Tea* –

This excellent organic Oolong comes from the high regions of the Chinese province Hubei. The carefully picked leaves are rolled only very gently and lightly fermented. The tea convinces with its look and intensive aroma. The infusion glows light yellow and has a fruity, floral flavour with a sweetish touch of apricot.

S3053 Thailand JING SHUAN OOLONG

– *Oolong Tea* –

An exclusive speciality from northern Thailand close to the borders of Myanmar and Laos. At altitudes of 400 to 700 m, surrounded by forests and blessed with consistent precipitations, exceptional tea specialities can be produced all year round. Typical for this Oolong, which is formed into small, olive green pearls, is the natural creamy sweetness and a subtle hint of orchids. In the infusion the pearls unfold into surprisingly long, slightly wavy leaves and produce a melon yellow cup.

S3020 Formosa FINEST OOLONG

– *Oolong Tea* –

Oolong beginners and connoisseurs alike will enjoy this very typical semi-fermented Oolong as it is low in tannin and has a naturally sweet taste.

S3054

S3040 HAPPY VALLEY DARJILONG organic

– Oolong Tea –

This is a unique pleasure for the connoisseur because the wonderful, typical Oolong taste beautifully combines with the distinct character of a Darjeeling.

S3024 Vietnam IMPERIAL OOLONG

– Oolong Tea –

A relatively tightly rolled, nearly green rare Oolong from Vietnam that surprises with a creamy-floral note and a fragrant bouquet.

S3021 Formosa CHOICEST OOLONG

– Oolong Tea –

The rough, typically brown leaf of this semi-fermented Oolong from Taiwan creates a pleasantly smooth flavour with a slight touch of honey.

S3019 Formosa JADE OOLONG

– Oolong Tea –

This Oolong from Taiwan is nearly green and only very lightly fermented with leaves that are rolled into small, tight balls. The jade-green cup, alluring scent and the softly fruity note reminiscent of peach blossoms make this tea stand out.

S3054 Formosa DARK PEARL OOLONG

– Oolong Tea –

One of the few Taiwanese tea specialities from the Tai Tung region on the eastern coast of the island. The carefully picked leaf is rolled repeatedly to form the typical pearls which “lock in” the flavour. This tea belongs with the longer fermented and afterwards roasted Oolongs. It captivates with its amber infusion and well-balanced sweetness with delicate notes of honey, vanilla and dried fruit.

S3019

YELLOW TEA

In contrast to green tea, yellow tea is not processed immediately after roasting but is wrapped in paper or cloth and left to cool. It is roasted and rewrapped again at intervals, ending with a final roasting. This procedure produces a tea that is hardly fermented, but removes the “grassy” or vegetal taste of green tea.

S3044 China YELLOW SUN

– Yellow Tea –

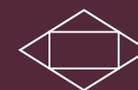

A yellow tea from the region of Huang Shan (“Yellow Mountain”) in the Chinese province Anhui with a large, wiry leaf. Produced after the traditional Chinese method this tea has a distinct flavour with natural sweetness and a hint of nuts and bread.

S3044

FLAVOURED BLACK TEAS

S4058

FLAVOURED BLACK TEA

These flavoured varieties are based on fine black teas of excellent quality. In combination with carefully selected flavours and perfect ingredients, they turn every individual cup into a delicious taste indulgence.

We offer seasonal teas such as Christmas blends in due course – or just ask for them at any time.

Our homepage contains information about premium blends from our Juicea® range with capsulated flavour granules.

S4020 **Almond Cream**

– *Flavoured Black Tea* –

Ingredients: black tea, **almond** pieces, flavourings

S4001 **Apple organic**

– *Naturally Flavoured Black Tea* –

Ingredients: black tea*, apple pieces*, natural flavouring

(* ingredients from organic production)

S4002 **Apricot**

– *Flavoured Black Tea* –

Ingredients: black tea, flavourings, sunflower petals

S5027 **Arabian Nights**

– *Red Berries Flavoured Blend of Black and Green Tea, Fruits and Blossoms* –

Ingredients: black tea (61%), China Sencha green tea (28%), natural flavouring, papaya pieces (papaya, sugar), currants (currants, sunflower oil), sunflower petals, rose petals, mallow blossoms

S9031

FLAVOURED GREEN & WHITE TEAS

S5054

Häilssen & Lyon
est. 1879

FLAVOURED GREEN TEA

Delicately flavoured and refined green and white teas are held in high esteem by tea lovers. The sophisticated art of flavouring tea that Hälsson & Lyon has perfected for almost 50 years as well as the base of high-quality green and white teas we use guarantee our customers a select, first-class product.

A particularly good base for flavoured green teas is Chinese Sencha, on which the ingredients spread evenly and can develop their full flavour. The temperature of the water should be about 90 degrees and the brewing time should not exceed two to three minutes. Like all green teas, the leaves can be brewed several times – to your personal liking.

S5055

S5030 Apple organic
– Flavoured Blend of Green Tea and Apple –
Ingredients: China Chun Mee green tea (80 %)*,
apple pieces (17,5 %)*, flavourings

FLAVOURED FRUIT BLENDS

S6017

FLAVOURED
FRUIT BLENDS

FLAVOURED FRUIT BLENDS

Our choice blends offer a deliciously fruity treat composed of well-known domestic as well as exotic fruits. Select ingredients and excellent flavourings combine to form tasty compositions that can be enjoyed hot or iced, as a delightful refreshment.

We offer seasonal teas such as Christmas blends in due course – or just ask for them at any time. Our homepage contains information about premium fruit blends from our Juicea® range with capsulated flavour granules.

Important information for your customers: Always use boiling hot water to prepare fruit, herbal and rooibos tea and let it brew for at least five to eight minutes! That is the only way to obtain a safe food.

flavourings

ROOIBOS & HONEYBUSH

S7017

ROOIBOS
& HONEYBUSH

ROOIBOS & HONEYBUSH

Specialities from South Africa

Rooibos is the popular national drink of South Africa. It is caffeine-free, full of flavour and rich in minerals and vitamins. Its natural sweetness makes it a real pleasure in both its plain and flavoured varieties. Rooibos grows only in the South African Cape region and is harvested between January and May.

As soon as the picked “brooms” are cut and pressed and the juice seeps out, natural fermentation sets in. Rooibos (red bush) acquires its characteristic red colour and full flavour during fermentation. To produce green rooibos this fermentation is stopped. Green rooibos is much lighter in taste than fermented rooibos.

The honeybush (*cyclopia intermedia*) grows in the Eastern Cape region of South Africa, in the Cederberg mountains. It produces a tea that is caffeine-free and rich in minerals and vitamins, much like rooibos. Compared with rooibos, honeybush is generally perceived as more full-bodied. Its fruity, sweetish and honey-like taste is becoming increasingly popular. We offer seasonal teas such as Christmas blends in due course – or just ask for them at any time.

Our homepage contains information about premium rooibos teas with capsulated flavour granules in our Juicea® range.

Important information for your customers: Always use boiling hot water to prepare fruit, herbal and rooibos tea and let it brew for at least five to eight minutes! That is the only way to obtain a safe food.

S7001 Rooibos Original

A typical rooibos with a glowing, red brown cup and soft, earthy and slightly sweetish note.

S7002 Rooibos Original organic

This non-flavoured rooibos is from organic production.

S7093

S7091 Green Rooibos organic

This unfermented variety is an alternative to the classic rooibos. It is slightly fruity and distinctly milder than the “red” rooibos.

S7081 Honeybush Original organic

The pure honeybush from the southeastern part of South Africa. The delicate branches, needlelike leaves and yellow blossoms are harvested. Full-bodied with a fine fruity and honey-like taste.

S7012 Almond Cream

– Flavoured Rooibos Blend –
Ingredients: rooibos, **almond** chips, flavourings

S7093 Banana Cupcake

– *Banana and Cupcake Flavoured Herb and Fruit Blend with Almonds, Brittle and Caramel Pieces* –
Ingredients: rooibos, apple, liquorice root, cocoa beans, **almonds** (4 %), brittle pieces (sugar, **hazelnut**, invert sugar) (4 %), caramel pieces (sugar, glucose syrup) (4 %), banana chips (banana, coconut oil, sugar, flavouring) (4 %), flavourings, marigold flowers.
Contains liquorice – people suffering from hypertension should avoid excessive consumption.

HERBAL BLENDS

S7094

HERBAL BLENDS

Whether plain, flavoured or mixed with Ayurvedic spices, our herbal blends are an indulgence for the whole family, wherever, whenever and however you like it.

Important information for your customers: Always use boiling hot water to prepare fruit, herbal and rooibos tea, and let it brew for at least five to eight minutes! This is the only way to obtain a safe food.

Please visit our homepage for information about premium herbal infusions with capsulated flavour granules in our Juicea® range.

- S7050 **Stinging Nettle Leaves**

MATE

Mate, the Argentinian national drink, is becoming ever more popular. It is produced from the leaves of yerba mate, *ilex paraguariensis*. Mate is often an ingredient in fasting teas. Traditionally, it is prepared in a calabash gourd and drunk through a metal straw, a bombilla. Mate leaves can be brewed several times with boiling hot water.

- S7060 **Mate Green**
- S7061 **Mate Roasted**

- S7062 **Mate Honey**

(* Ingredients from organic production)

LAPACHO

This 'tea' is obtained from the inner bark of the South American Red Lapacho tree. Properly prepared, the pleasant flavour is slightly reminiscent of vanilla. Lapacho tea should be enjoyed lukewarm or cold.

Preparation: Put 1 to 2 tbs of Lapacho bark into one litre of cold water. Bring to a boil, simmer for five min. and allow to brew for another 10 to 15 min.

- S7059 **Lapacho**

GREAT PRODUCT VARIETY

- Classic and flavoured black and green teas, white teas, Oolongs, rooibos, mate, herbal and fruit infusions
- Extracts, instant mixes, ready-to-drink concepts
- Decaffeinated teas
- Organic teas and other certified products
- Tea specialities

PERMANENT QUALITY ASSURANCE

- Highest quality standards: analysis by the accredited SGS Institut Fresenius laboratory
- Extensive certifications: Fairtrade, Organic, UTZ Certified, HACCP, Kosher, etc.
- Own control mechanisms and audits
- Complete quality control from raw materials through to production and shipment

PACKAGED TEAS & PRIVATE-LABEL

- Development of optimal packaging formats for premium teas
- Customised packaging solutions for specified minimum purchase quantities
- From a single source: everything from blending to the finished package on the shelf

DEVELOPMENT & PRODUCTION

- Enriching refinements and development of new products – also in close cooperation with our customers
- Own production and processing of herbs and fruits
- Production of the finest blends
- Unique expertise in flavouring

General Conditions of Sale and Delivery / January 2014

1. General Provisions

- 1.1 The following General Conditions of Sale and Delivery (hereinafter called "COD") shall apply to all commercial contracts with our customers (hereinafter called "Buyer"). We do not accept any deviating, conflicting or additional general terms and conditions provided by the Buyer, in particular not by silence or unconditional performance of the contract.
- 1.2 These COD shall apply only if the Buyer is an entrepreneur (Sec. 14 German Civil Code (BGB)), a governmental entity or forms a special governmental estate. The COD currently in force shall govern all future sales contracts between the Parties without us having to expressly refer to them each time. We will inform the Buyer without undue delay of any modifications to the COD.
- 1.3 Individually negotiated agreements (including side agreements, additional agreements and modifications) take precedence over these COD. The content of such agreements is determined by our written confirmation.

2. Contract Formation

- 2.1 All offers are made without obligation and subject to prior sale unless expressly agreed otherwise.
- 2.2 Purchase Orders are accepted by our issuing of an invoice or a written order confirmation. The Buyer is deemed to have agreed to our COD by accepting delivery of the goods.

3. Delivery

- 3.1 Unless agreed otherwise, we shall provide for any import licence or import declaration necessary to import the goods into the European Union.
- 3.2 Our goods are natural products whose weight may change during transport due to external influences like humidity. The weight indicated by us upon conclusion of the contract shall be determined by the weight of the goods upon leaving the warehouse. In case of deviations of less than 5% in either direction that are caused during the subsequent transport, any claims by the Buyer under Clause 6. below shall be excluded.

4. Terms of Delivery and Default in Delivery

- 4.1 The delivery time will be individually agreed upon or indicated by us upon acceptance of the order, respectively. The indication of a delivery date is conditional on the Buyer's cooperation due under these COD (e.g. timely receipt of permits).
- 4.2 If we are unable to comply with a binding delivery time for reasons not attributable to us (unavailability of performance, "Nichtverfügbarkeit der Leistung"), we will inform the Buyer without undue delay and notify him of the expected new delivery date. If we remain unable to deliver within the new delivery time, we may cancel the contract in part or as a whole; in this case we will refund the Buyer without undue delay any consideration already paid. Performance shall be deemed to be unavailable in the sense of sentence 1 of this sub-clause in particular if our supplier does not deliver the products in time and (i) we have entered into a supply contract covering the respective delivery ("kongruentes Deckungsgeschäft"), whereas neither we nor our supplier can be held responsible for the delay ("vertreten müssen") or (ii) we are not obliged to deliver the goods in the individual case.
- 4.3 If, after conclusion of the contract, it becomes apparent that the Buyer cannot sufficiently warrant for his solvency, thus putting our payment claim at risk (e.g. in case of a request for the opening of insolvency proceedings), we may refuse to deliver until the Buyer either has paid the purchase price or provided for security (Section 321 BGB, German Civil Code). If neither the payment nor the provision of security is effected within 12 days upon request, we may cancel the contract.
- 4.4 Unless stated otherwise in the following, we are in default with the delivery in accordance with the applicable statutory law. However, the Buyer shall always send a reminder. If we are in default, the Buyer may claim a lump sum compensation amounting to 0.5% of the net price of the goods not delivered per complete

calendar week, however, max. 5% of the net price of the goods not delivered. We reserve the right to provide evidence that the Buyer did not suffer any damage at all or only a considerably lower damage.

- 4.5 In case of default, the Buyer shall, upon request, notify us within a reasonable time if he insists on the delivery or intends to cancel the contract. The Buyer may cancel the contract in case of default in delivery only in accordance with Clause 7.4 below.

5. Passage of Risk, Default of Acceptance

- 5.1 Delivery shall be ex warehouse which shall also be the place of performance. Unless agreed otherwise, we may determine the transport modifications (in particular the carrier, shipping method and packaging).
- 5.2 If the Buyer is in default of acceptance, fails to perform an act of cooperation or intentionally or negligently causes a delay in delivery, we are entitled to claim compensation for the resulting damage including any additional expenses (e.g. storage costs). For this purpose, we may claim a lump sum compensation amounting to 0.5% of the net price of the goods not deliverable per complete calendar week, beginning with the agreed delivery date or - in the absence of such - with the announcement that the goods are ready for dispatch, however, max. 10% of the net price of the goods not deliverable in case of final non-acceptance of delivery. We reserve the right to provide evidence of higher damages and make further statutory claims; however, the lump sum compensation paid in accordance with sub-clause 5.2 will be deducted from any further payment claims.
- 5.3 We may deliver and invoice partial deliveries if the same can reasonably be expected to be accepted by the Buyer.

6. Warranty Rights

- 6.1 As regards the Buyer's rights in case the delivered goods are defective, the applicable statutory law shall apply, unless stated otherwise in the following.
- 6.2 We warrant that the goods comply with the applicable European law, provided that we were informed that the goods are intended to be sold on the European market. In all other cases, the goods shall comply with the quality agreed between the parties.
- 6.3 If a defect does not or only immaterially impair the value of the goods and the fitness for their purpose, the Buyer's warranty rights shall be excluded.
- 6.4 The Buyer's statutory duty to examine and give notification of any defects set out in Section 377 HGB (German Commercial Code) applies. The Buyer has to notify us of any defects without undue delay and in writing. A notification will be deemed timely if the Buyer notifies us within two weeks after discovery, the timely dispatch of the notification being sufficient. Notwithstanding the above, the Buyer shall notify us of any apparent defects (including delivery of wrong items and delivery of wrong quantity) within two weeks after delivery, the timely dispatch of the notification being sufficient. If the Buyer fails to examine the goods or notify us of a defect in time, our liability for the relevant defect is excluded.
- 6.5 We shall be entitled to make any subsequent performance conditional on the full payment of the contract price. The Buyer may, however, retain a portion of the contract price appropriate in relation to the defect.
- 6.6 The Buyer shall give us the time and opportunity required to cure any defects. In particular, the Buyer shall, upon request, provide us with a sample of the defective goods for inspection purposes. In case of a replacement delivery the Buyer shall be obliged to return the defective delivery in accordance with the applicable statutory law.
- 6.7 We shall bear the costs necessary for inspection and subsequent performance only if the goods are defective. However, if the Buyer's warranty claim is not justified, we are entitled to claim compensation for the resulting costs.
- 6.8 The Buyer may claim damages or reimbursement of expenses only in accordance with Clause 8 below.

7 Liability

- 7.1 Unless otherwise provided for in these COD, our liability for the breach of any obligation shall be governed by the applicable statutory law.
- 7.2 We are liable to the Buyer only for damage caused by intent or gross negligence. In case of simple negligence, our liability is limited to
- damage claims due to harm done to a person's life, body or health,
 - damage claims due to the breach of a material contractual duty ("wesentliche Vertragspflicht"), meaning a duty the discharge of which allows the proper performance of the contract in the first place and on the fulfilment of which the Buyer can regularly rely; in this case, however, our liability is limited to the foreseeable and typical damage.
- 7.3 The restrictions of liability named in sub-clause 7.2 shall not apply if we intentionally did not disclose a known defect of the goods or assumed a guarantee for their quality. The same applies to claims raised under the German Product Liability Act (Produkthaftungsgesetz).
- 7.4 In case of a breach of duty that does not constitute a defect, the Buyer may only cancel the contract in case of intent or negligence ("vertreten müssen"). In all other cases, statutory law applies.
- 7.5 As far as our liability is excluded or limited, this shall also apply to the personal liability of our employees, agents and other persons assigned by us to perform our obligations.

8. Retention of Title

- 8.1 Property in the goods shall not pass to Buyer until we have received full payment of the purchase price and any other payments due under the contract or an on-going business relationship with the Buyer.
- 8.2 The goods subject to retention of title may not be pledged nor assigned as security to third parties until all payments secured under sub-clause 1 are settled. The Buyer shall inform us without undue delay and in writing of any attachment by third parties to the goods and its extent.
- 8.3 In case the Buyer breaches his obligations under the contract, in particular if he is in default, we may cancel the contract and demand return of the goods after having set a reasonable deadline for the Buyer to perform his obligations; however, the statutory provisions concerning the dispensability of setting a deadline shall remain unaffected.
- 8.4 The Buyer shall be entitled to resell and/or process the goods subject to retention of title in the ordinary course of his business, in accordance with the following provisions:
- In case the goods subject to retention of title are processed, combined or mixed with other goods, retention of title shall apply to the newly created goods, whereas we shall be deemed to be the manufacturer of these goods. In case property rights of third parties have not lapsed in the course of processing, combining or mixing the goods, we shall have a co-ownership share corresponding to the invoice value of the goods originally delivered by us. With regard to the newly created goods, the provisions of this clause 7. shall apply correspondingly.
 - The Buyer hereby assigns to us as security any payment claims resulting from the resale of the delivered goods or the newly created goods subject to retention of title in full or in part corresponding to our co-ownership share in accordance with the sub-clause (a). We accept such assignment. The duties of the Buyer under clause 8.2. shall also apply to the assigned claims.
 - The Buyer shall remain authorized to collect the claims beside ourselves. We shall not collect the claims as long as the Buyer meets his payment obligations, is not in default, no application for the opening of insolvency proceedings has been filed and there is no other deficiency in his performance. If such is the case, however, we may request that the Buyer provides us with a list of all goods still subject to retention of title, including those that have been processed, discloses the assigned claims and their debtors, provides all details required for the collection, hands over all related documents and notifies the debtors of the assignment.

- If the realizable value of our securities exceeds our claims by more than 10 %, we shall release securities of our choice upon request of the Buyer.
 - We are entitled to withdraw the Buyer's right to process and/or sell the goods subject to retention of title within the ordinary course of his business in case of default or the application for the opening of insolvency proceedings is filed.
 - Retention of title shall remain effective even if some of our claims are included in a current account the balance of which has been established and acknowledged.
- 8.5 The Buyer shall store the goods subject to retention of title and insure them against fire and water damage, theft as well other risks of damage at his own expense. The Buyer hereby assigns to us the respective claims for compensation against insurance companies or other parties liable for any damages in the amount of our claims. We accept such assignment.

9. Prices

- 9.1 Unless agreed otherwise, our prices valid on the date of the conclusion of the contract shall apply. These prices are ex work and plus VAT applicable upon delivery.
- 9.2 The Buyer shall bear the costs of any customs duties, taxes, fees or other public charges.
- 9.3 Disposal or taking back of empties and any kind of packaging material is not included in the price.

10. Payment Terms

- 10.1 Unless agreed otherwise, payments shall be due 14 days after receipt of an invoice and delivery of the goods. If the Buyer fails to meet this deadline, he shall be in default in accordance with the applicable statutory law.
- 10.2 If payment by bill of exchange has been agreed, all expenses including any collection charges and other costs like bill stamps ("Wechselstempel") shall be on the Buyer's account. Cheques and/or bills of exchange will be accepted only as conditional payment and shall not be considered payment until after receipt of the equivalent sum.
- 10.3 The Buyer shall have the right of set off or retention only in relation to counter claims which are undisputed or have been confirmed by a final court judgment.

11 Limitation Period

- 11.1 Notwithstanding Section 438 para. 1 No. 3 BGB (German Civil Code), warranty claims shall be time-barred after 1 year of the passage of risk.
- 11.2 The limitation period named in sub-clause 1 shall apply accordingly to any contractual or non-contractual damage claims based on a defect of the goods unless in the individual case the application of the limitation periods provided by law result in a longer limitation period. In all other cases of damage claims covered by clause 7, the statutory limitation period shall apply.

12 Jurisdiction and Applicable Law

- 12.1 The exclusive – and international- place of jurisdiction for all disputes arising out of the contractual relationship between the Parties shall be Hamburg, Germany. We are, however, entitled to commence legal proceedings at the business seat of the Buyer.
- 12.2 These COD and all legal relations between the Parties shall be governed by the laws of the Federal Republic of Germany excluding the UN Convention on Contracts for the International Sale of Goods (CISG).

The catalogue is valid from September 2016.
